Table Keys (Scale 1-5): 1 = Superior, 2 = Excellent, 3 = Average, 4 = Below Average, 5 = Not Recommended

DRI: U of Wisconsin multiple pest Disease Rating Index = 1 - 30, where 30 = Best

***Fall Dormancy:** 1 = Norseman, 2 = Vernal, 3 = Ranger, 4 = Saranac

Diseases: R = Resistant, MR = Moderate, HR = High Resistance

Scores and characteristics may change according to environment, growing conditions and region.

Legend Extra

- Extremely tolerant to wheel traffic
- A medium tall variety with a thick, dense, leafy canopy.
- A dark green plant color
- 100% multifoliolate expression
- Superior forage quality
- Stable yields with a long stand life
- Topped trials in milk/acre, tons/acre and RFQ in fall dormancy regions 3, 4 and 5

LHR 3500 Plus **NEW**

- This is a combination of varieties with high resistance to potato leafhoppers (PLH)
- Higher yields and quality under PLH infestations
- Strong winter hardiness
- DRI 30

Foremost Alfalfa

- Top of test yields
- Superb forage quality
- Wide geographic adaptation
- Excellent pest and disease package

LS HY615

- Consistently wins yield and quality trials
- Very good persistence and fast regrowth after cutting
- Superior stem to crown ratio = Very fine stemmed
- Outstanding disease, insect and nematode resistance. DRI of 30
- Best in high producing well drained soils
- 7% -12% yield advantage over synthetic varieties

Also available as HY615 Wet and HY615 LFD

Northern Lights 210

- Multi-leaf alfalfa with excellent forage for dairyman or cattleman demanding a long-term alfalfa
- Broad base of disease resistance to protect it in less than desirable soil conditions
- Pronounced dark green color that producers will easily identify in their fields

Legend 8888

- A premium blend of winter hardy alfalfa varieties
- Alfalfa with high yield and quality potential
- DRI 24

Milkers Plus Alfalfa

- High yields
- Persistence and winter hardiness
- Strong survival traits
